San Francisco Bay Area

## SUMMARY

I have 8+ years experience in both front-end and back-end development, troubleshoot and technical support of .NET apps.

I have a solid knowledge of Microsoft Azure cloud computing platform & services, including development, deployment, maintenance, troubleshoot and automation. I work with both IaaS and PaaS models, as well as SaaS.

In a spare time, I explore different web and mobile frameworks. I feel excited about cloud first and mobile first strategy when designing and developing applications, and keep learning more about cloud, web and mobile apps.
